Machine Learning | Business Analyst | Python | SQL | Data Analytics | Business Intelligence

Business Analyst and Data Analyst with 3+ years of experience across enterprise technology, data analytics, business intelligence, ERP systems, and process optimization. Experienced in SQL, Power BI, Advanced Excel, Python, data migration, data validation, UAT, KPI reporting, and stakeholder management. Proven ability to translate business requirements into data-driven solutions, identify data-quality issues, automate reporting workflows, and deliver actionable insights for business decision-making. Currently completing a Master's in Data Science, AI, and Digital Business, with additional expertise in machine learning, predictive analytics, and Generative AI.

PROFESSIONAL EXPERIENCE

AI-ASSISTED PRODUCT CONFIGURATOR THESIS | EMERSON – BERLIN, GERMANY – JULY 2026 – CURRENT

- Built an AI-assisted 731 Series configuration tool combining Python, machine learning, deterministic business rules, and a Knowledge Graph to support technically valid product selection.
- Converted 1,000+ real configurator rule records into a Knowledge Graph, enabling structured validation of product families, technical attributes, and configuration constraints.
- Developed a pairwise ML ranking model achieving 90.57% Top 1 recovery of synthetic engineer preferences for ranking technically compatible configurations.
- Automated the RFQ-to-configuration workflow, extracting customer requirements and returning the complete set of technically compatible options before applying ML-based ranking.
- Developed a Streamlit PoC with validation and explainability features, including alternative comparison, engineer-review alerts, configuration audits, and complete compatible-configuration exploration.

WERKSTUDENT BUSINESS ANALYST | EMERSON - BERLIN, GERMANY - JULY 2025 – CURRENT

- Managed end-to-end migration of 100K–150K sales records from Microsoft Dynamics NAV to Oracle ERP, performing data mapping, cleansing, validation, and reconciliation to achieve 98–99% data accuracy.
- Developed SQL- and Excel-based validation rules in collaboration with Finance and IT, reducing manual data-quality effort by 35% and improving migration reliability.
- Built Power BI dashboards to monitor migration progress, data quality, validation failures, and business-critical KPIs, enabling stakeholders to identify issues before go-live.
- Managed and coordinated resolution of 150+ data defects through structured workflows and cross-functional collaboration, achieving 95% on-time resolution.
- Standardized data-validation and reporting processes, reducing downstream data-quality issues by 40% and improving reporting consistency.
- Supported UAT by validating 50+ end-to-end business scenarios across Oracle environments, ensuring alignment between business requirements, source data, and system outputs.
- Collaborated with Finance, IT, and business stakeholders across multiple teams to resolve data issues, support system readiness, and improve enterprise data workflows.

DATA ANALYST | GODREJ INFOTECH LIMITED - MUMBAI, INDIA - JUNE 2023 – March 2024

- Analyzed enterprise credit and financial datasets using SQL and Excel to identify data-quality issues, trends, anomalies, and operational insights for business stakeholders.
- Built and maintained SQL/SSIS data workflows for extracting, transforming, and validating business data, improving data accuracy and reducing downstream manual corrections by ~20%.
- Developed Power BI dashboards tracking 10+ business KPIs, including loan performance, credit risk, and fraud-related indicators, enabling stakeholders to monitor performance and identify anomalies.
- Created DAX-based measures and standardized reporting logic in Power BI, improving consistency of KPI reporting and supporting data-driven business decisions.
- Performed root-cause analysis on data discrepancies and collaborated with business and technical teams to investigate issues and implement corrective actions.
- Conducted ad-hoc data analysis to identify trends, performance gaps, and anomalies, contributing to improved operational and financial decision-making.

SR BUSINESS DEVELOPMENT ASSOCIATE | BYJUS – MUMBAI, INDIA - MAY 2021 - APRIL 2023

- Led data-driven marketing and outreach campaigns, increasing customer engagement by ~20–25% through targeted email and content strategies.
- Analyzed customer behavior and campaign performance using Excel and CRM tools to identify trends and optimize lead generation and conversion.
- Improved client retention by ~15% by refining sales strategies and strengthening customer engagement approaches.
- Collaborated with Marketing, Sales, and Operations teams to track performance metrics and improve campaign execution.

EDUCATION

MASTERS IN DATA SCIENCE, AI, AND DIGITAL BUSINESS | April 2024 – Sep 2026 | GISMA UNIVERSITY OF APPLIED SCIENCE, BERLIN, GERMANY

BACHELORS IN BUSINESS MANAGEMENT | 2018 – 2021 | MUMBAI UNIVERSITY, INDIA

TECHNICAL SKILLS

- Data Analytics:** SQL, Python, Excel, Power BI, DAX, Dynamics KPI Reporting, Dashboard Development, Data Analysis
 - Business Analysis:** Requirements Analysis, UAT, Data Validation, Root-Cause Analysis, Process Improvement, Stakeholder Management. Forecasting, Model Evaluation
 - Data Engineering:** ETL, SSIS, Data Transformation, Data Quality, Data Migration, Data Warehousing
- ERP & Enterprise Systems:** Oracle ERP, Microsoft NAV, Microsoft Dynamics 365, SAP S/4HANA
 - Machine Learning & AI:** Scikit-learn, Predictive Analytics, Feature Engineering, Model Evaluation, Generative AI, LLMs, RAG.
 - Cloud & Big Data:** AWS S3, AWS Redshift, Databricks Apache Spark, Hive

CERTIFICATION

[SAP Analytics Cloud](#) | [SAP Cloud ERP](#) - SAP
[How to Get into Cloud Computing](#) – University of Leeds
[AWS Artificial Intelligence Practitioner](#) – Amazon Web Services

LANGUAGES

English: C2 — Professional proficiency
German: B1 — Intermediate

INTERNSHIP EXPERIENCE

DATA ANALYTICS AND VISUALIZATION INTERN – VOSYN INC – ONTARIO, CANADA – FEB 2025 – MAY 2025

- Analyzed 40K+ records to identify trends, performance gaps, and operational insights, improving decision-making turnaround time by ~15%.
- Developed Power BI dashboards tracking 8–10 KPIs, improving operational visibility and reducing manual reporting effort by ~20%.
- Cleaned and transformed datasets using Excel and Power BI, improving data accuracy and consistency by ~18%.

BUSINESS DEVELOPMENT INTERN – GAOTEK INC. – NEW YORK, USA – June 2024 – Sep 2024

- Conducted market research and competitive analysis across 5+ target segments, identifying high-potential industries and improving lead targeting.
- Executed CRM and email outreach to 1,000+ prospects, generating 120+ qualified leads and improving response rates by ~18%.
- Analyzed campaign performance using Excel and CRM data, contributing to a ~12% improvement in lead-to-conversion ratio.

SELECTED PROJECT

[CUSTOMER CHURN PREDICTION MODEL](#) - PYTHON | SCIKIT-LEARN | MACHINE LEARNING

- Built classification models using Random Forest and Gradient Boosting to predict customer churn from behavioral and transactional data.
- Performed EDA, feature engineering, and model evaluation using precision, recall, F1-score, and ROC-AUC.
- Generated actionable insights to identify high-risk customer segments and support retention strategies.

[RAG-BASED ENTERPRISE KNOWLEDGE ASSISTANT](#) - PYTHON | LLMS | RAG | VECTOR SEARCH

- Developed an AI-powered enterprise knowledge assistant for conversational access to business documentation.
- Implemented document ingestion, chunking, embeddings, and semantic retrieval using a RAG pipeline.
- Improved information discovery by enabling context-aware responses across large volumes of enterprise documents.
